ERGO

MONITOR MOUNT

Elegance, Health and Ergonomic, Performance and Flexibility

Health and Efficiency improvement at workspace

Placing the monitor in an ergonomic position cause reduction problems due to long working hours and improper sitting position. Providing a variety of angles and directions, enables the operator to increase the efficiency and performance at offices and home-offices as well.

High flexibility and optimum eye sight

Respect to pneumatic gas spring inside and also practical hinges, the monitor will be adjusted in required direction easily. The holder enables the monitor screen to be rotated 360 degrees, till 15 degrees downward and 85 degrees upward, eye sight adjustment and also vertical and horizontal free rotation in order to reach the optimum conditions.

Desktop organizer and cables guide

Due to the design and different installation methods, your desktop will be more ordered and also prevent usual disorders especially caused by cables.

Easy installation

There are two options to install the holder; whether it is possible to apply by the edge of the desk or being installed in the middle of the desk. According to international standard of holes position, VESA, you may apply for 75*75 or 100*100(mm) in all supporting VESA monitors between 17 to 27 inches.

Production quality

Applying ABS and Aluminum together, makes the visual quality stylish. High quality for raw materials also has helped the product for a longer lifetime. Adjusting screw makes it possible to adjust different monitors with different sizes and weights.
